SKILLS

JavaScript (Expert) • TypeScript • SQL

TECHNICAL SKILLS

React.js, Next.js, Redux, Tailwind CSS, Tan Stack Query, shadcn/ui, Node.js, Express.js, MongoDB, REST APIs, GraphQL, JWT Auth, Redis, Web Sockets, AWS (EC2, S3, CloudFront, Load Balancer), Docker, CI/CD, Vercel, AI APIs (Gemini), Razorpay, Google Maps API, Cloudinary, Multer, Git, GitHub, GitLab, Postman, Agile/Scrum

INTERNSHIP

Software Development Intern

Tech Walnut Innovation LLP | | January 2025 – June 2025

- Led 60% of frontend development for a Hospital Management System, creating 10+ reusable React components to support real hospital workflows.
- Delivered a complete HRMS frontend and backend with real-time data rendering, significantly reducing manual HR processing time.
- Applied clean architecture practices to improve codebase maintainability, facilitating faster onboarding for new developers.

Full Stack Developer Intern

TDS Avenue Code Forge | | August 2024 – January 2025

- Designed and secured REST APIs with JWT authentication and optimized MongoDB schemas to support concurrent multi-role access.
- Independently developed the backend for Fresh Picked, a vegetable delivery application, focusing on scalability and data integrity.
- Collaborated directly with founders and designers, taking full end-to-end ownership of features from wireframe to deployment.

EXPERIENCE

Full Stack Developer

Brain Inventory (via Turing) | | August 2025 – Present

- Selected as a contractor by Turing, a platform that recruits the top 1% of global developers, and deployed to Brain Inventory for production-grade projects.
- Developed 40% of the frontend for DriveG, a Google Drive-style file management system, utilizing React.js and REST APIs.
- Resolved critical bugs in Table Open, a live production application, reducing reported issues and enhancing user stability.
- Reviewed and mentored code for peer developers across both projects, enforcing architecture standards and best practices.

PROJECTS

Cold Mailer AI

- Developed an AI-powered cold email generator with over 200 active users among students and sales professionals.
- Built core functionalities including email generation, in-app editing, authenticated history tracking, and complete end-to-end product development.
- Designed scalable REST APIs and optimized React state management to efficiently handle concurrent authenticated sessions.
- --END RESUME---
